Formed Aluminum
Never Lost Hinging Lid

Sturdy Rear Handle

Patented hybrid performance!

This highly efficient blend of formed aluminum, structural plastic and carbon steel will provide exceptional performance and sustainability for your collection program.

- Engineered for Indoor or Outdoor use the Hexcycle® Max has been critically engineered to exceed all expectations!
- The “never lost”, noncorrosive and recyclable aluminum lid features a stainless steel hinge.
- Powder coated aluminum flange distinguishes recyclables and facilitates vinyl labels (included).
- The UV inhibited structural plastic body creates strength with minimal use of plastic.
- The “back-saver” ergonomically placed hinging resin handle is thoughtfully designed with the user in mind.
- Crisp, distinct direct printed fade proof graphics provide clear messaging while enhancing your facility.
- A carbon steel base creates a low center of gravity for stability in high traffic or windy outdoor conditions.
- Sustainability: Manufactured with the most recyclable materials: Aluminum, Steel, and Structural Polypropylene
- Shipping costs and packing materials are greatly reduced with this Fuel Saver design that packs flat.

Size: 40.25”H x 18.5” W
Weight: 12 lbs.
Price: \$125
Gallons: 29
Capacity: 237 12 oz cans / 144 16 oz bottles / 200 lbs of paper
Material: Powder coated aluminum, Structural plastic, Stainless steel, Galvanized carbon steel
